”I wish everybody was as nice as I am.”

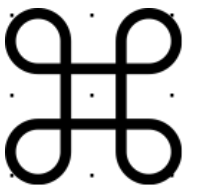

”I'm always happy when I'm protesting.”

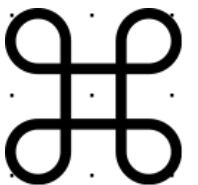

**“Our services are social, mobile, and simple,
and in the cloud.”**

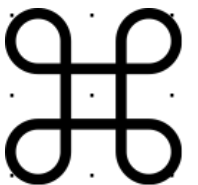

“We don't merge kernel code just because user space was written by a retarded monkey on crack.”

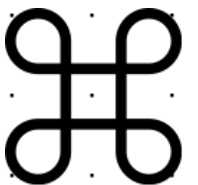

”I am putting myself to the fullest possible use, which is all I think that any conscious entity can ever hope to do.”

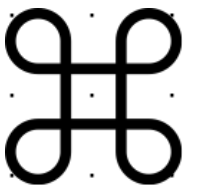

”Standards are paper. I use paper to wipe my butt every day. That's how much that paper is worth.”

“When you give everyone a voice and give people power, the system usually ends up in a really good place. So, what we view our role as, is giving people that power.”

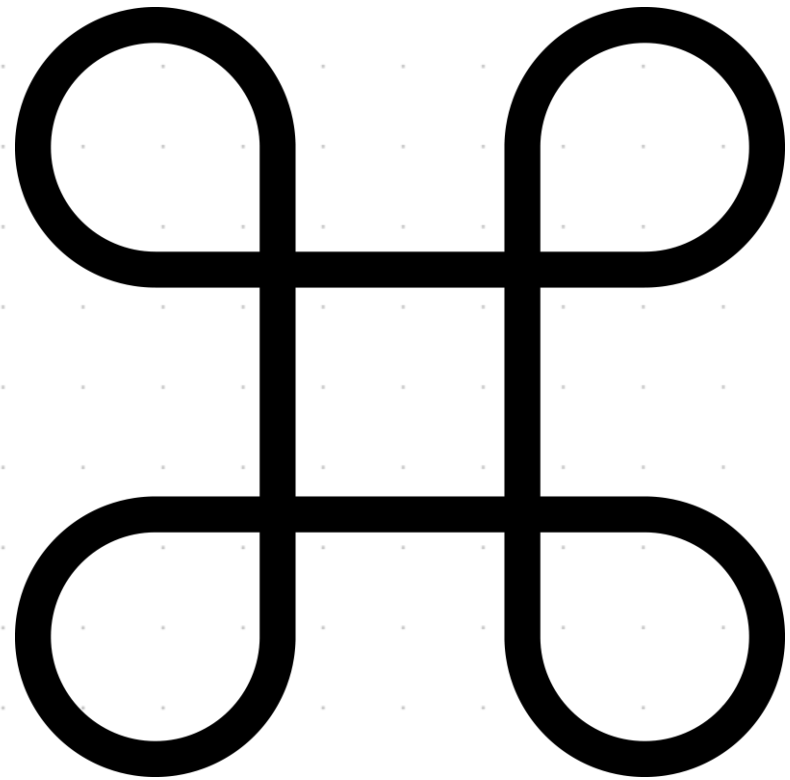

”In the broadest context, the goal is to seek enlightenment – however you define it.”

“For personal reasons, I do not browse the web from my computer [...] To look at a page I send mail to a daemon which runs wget and mails the page back to me. It is very efficient use of my time, but it is slow in real time.”
