A long time ago in a galaxy far, far away....

Or not?!

The world is changing...

Yesterdays friend, todays crazy man, tomorrows X?

Are you in control?

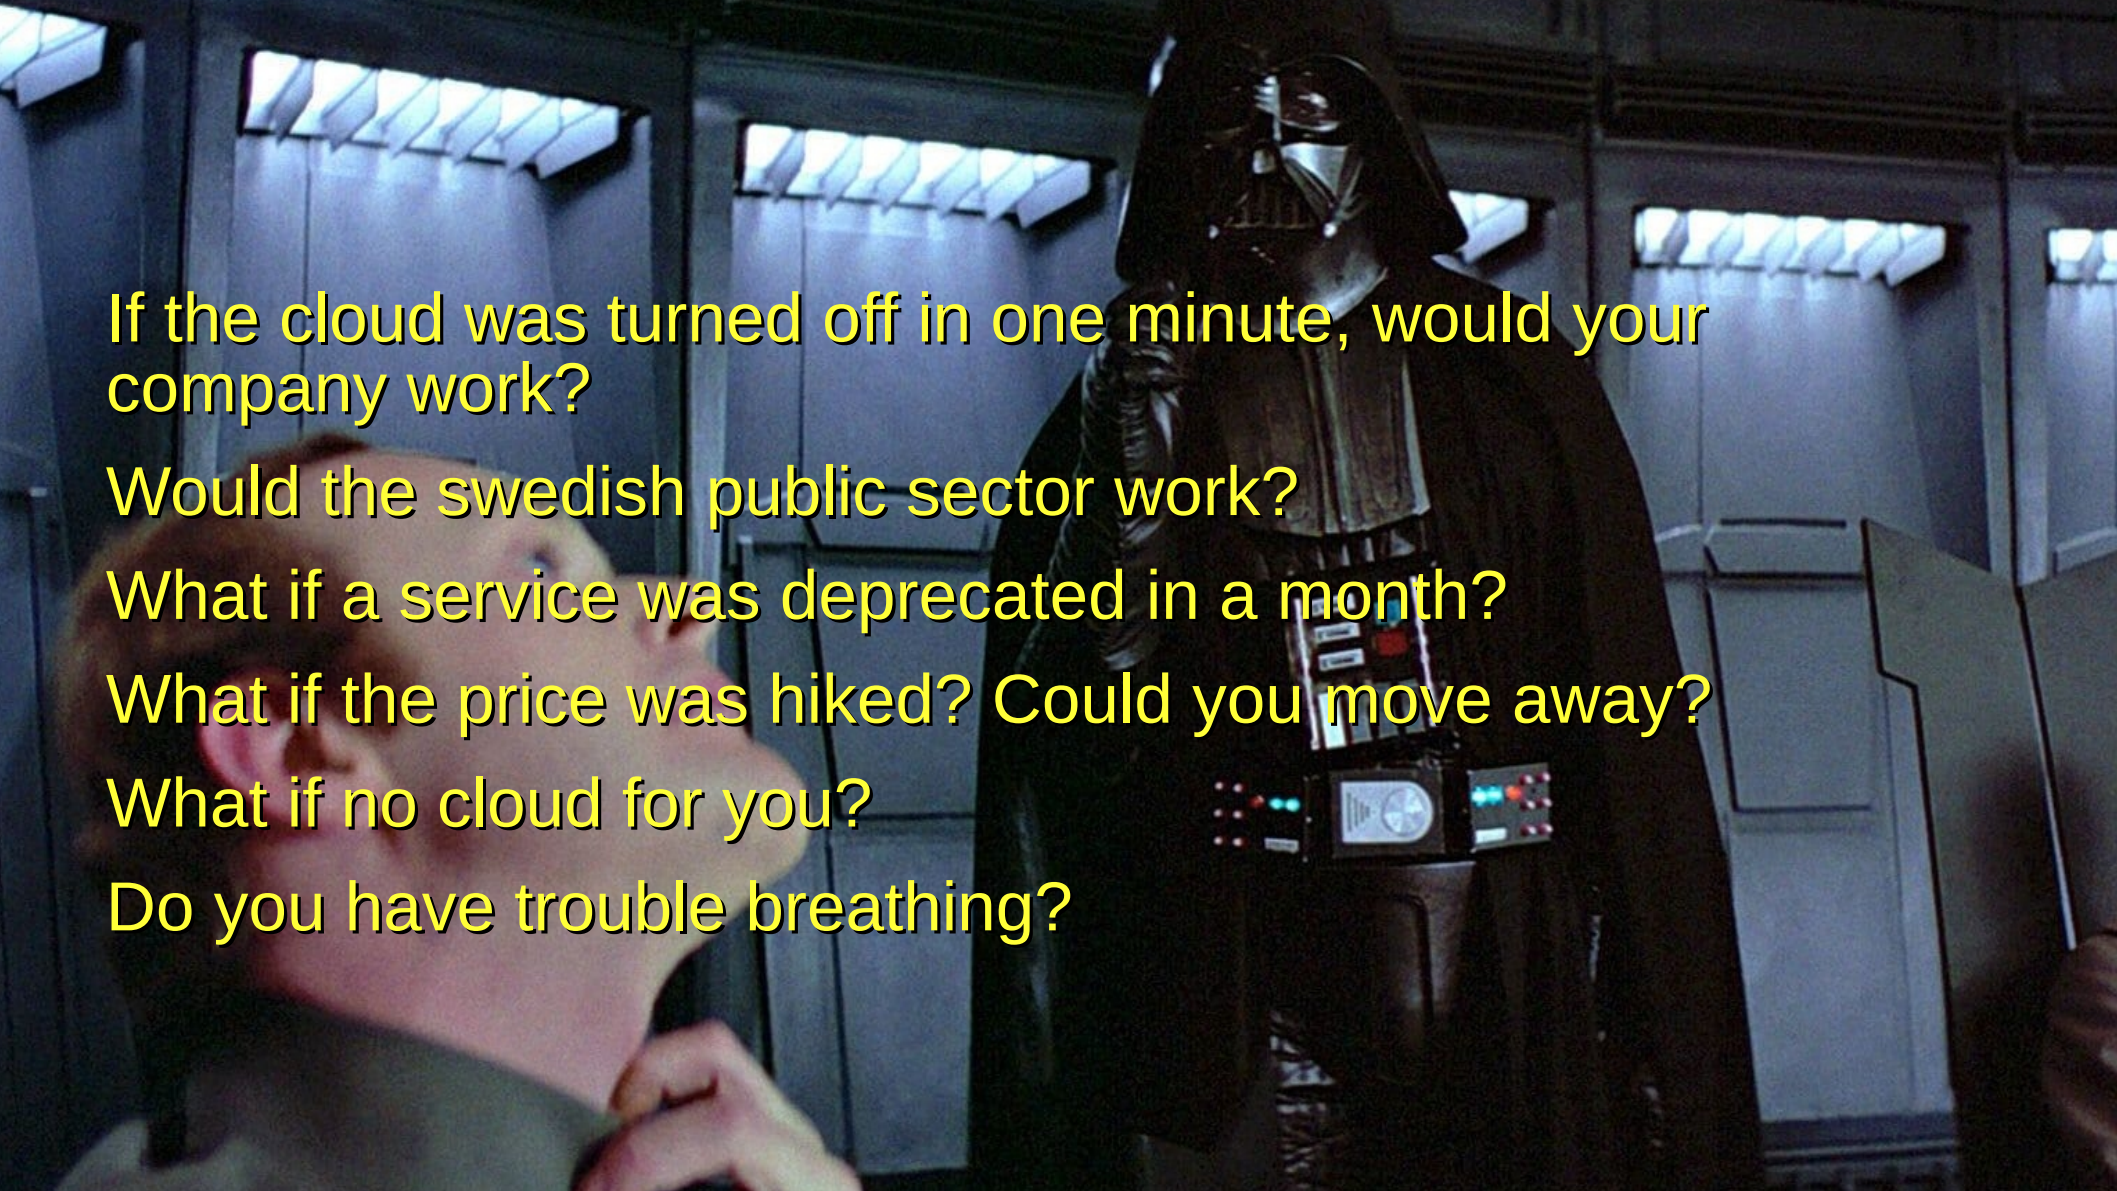

Can you control the force?

What about the cloud?

Do you control...

...the source?

A man in a light-colored shirt is looking up at Darth Vader, who is standing in a server room. The room has blue walls and several rectangular light fixtures on the ceiling. The text is overlaid on the left side of the image.

If the cloud was turned off in one minute, would your company work?

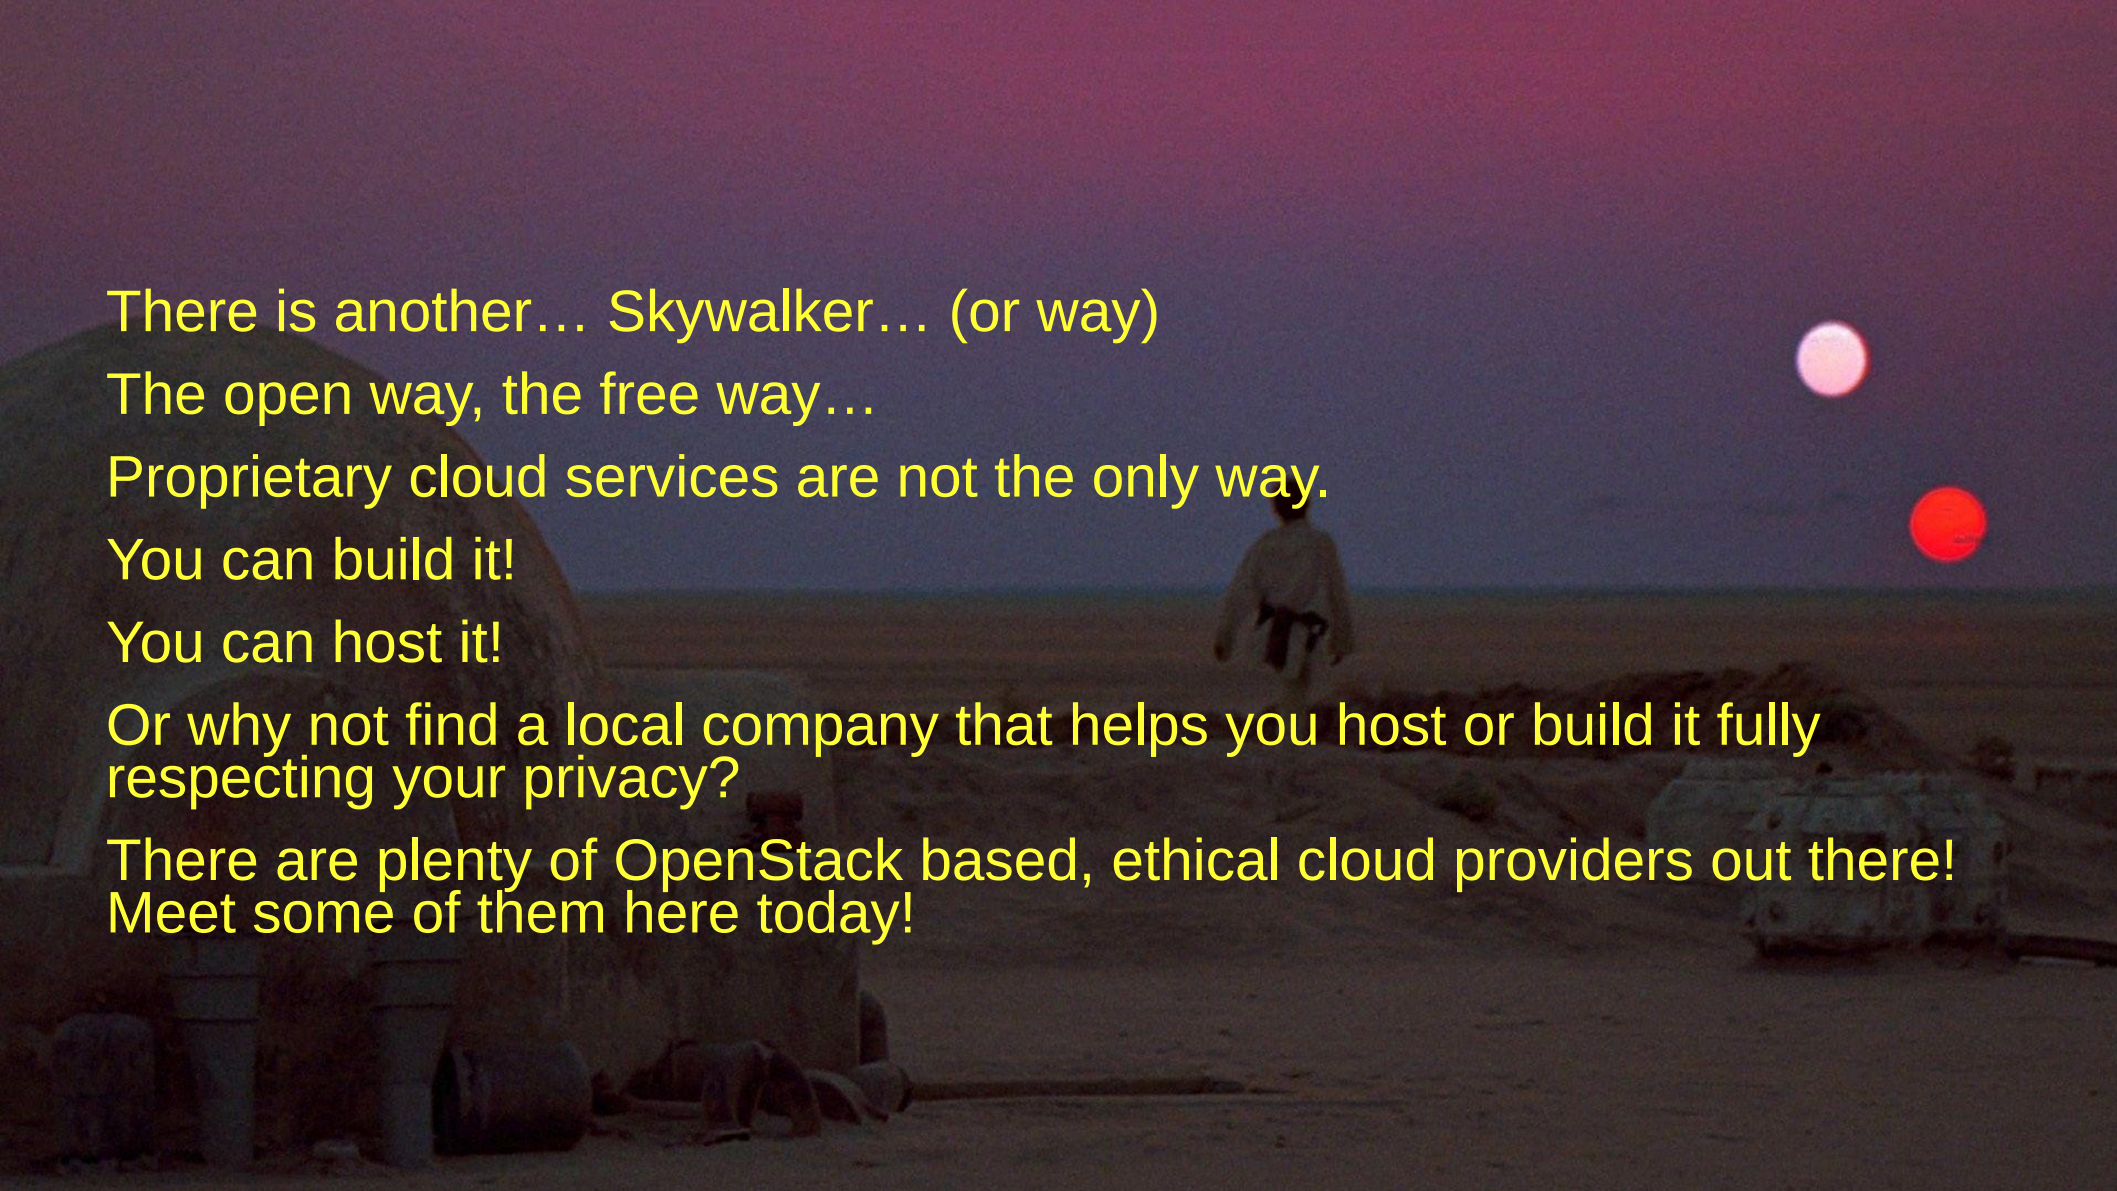

Would the swedish public sector work?

What if a service was deprecated in a month?

What if the price was hiked? Could you move away?

What if no cloud for you?

Do you have trouble breathing?

A person in a white robe, resembling a Jedi, is walking away from the viewer across a sandy, desert-like landscape. In the background, two large, glowing suns (one yellow, one red) are visible in a dark, hazy sky. The scene is reminiscent of the planet Tatooine from Star Wars.

There is another... Skywalker... (or way)

The open way, the free way...

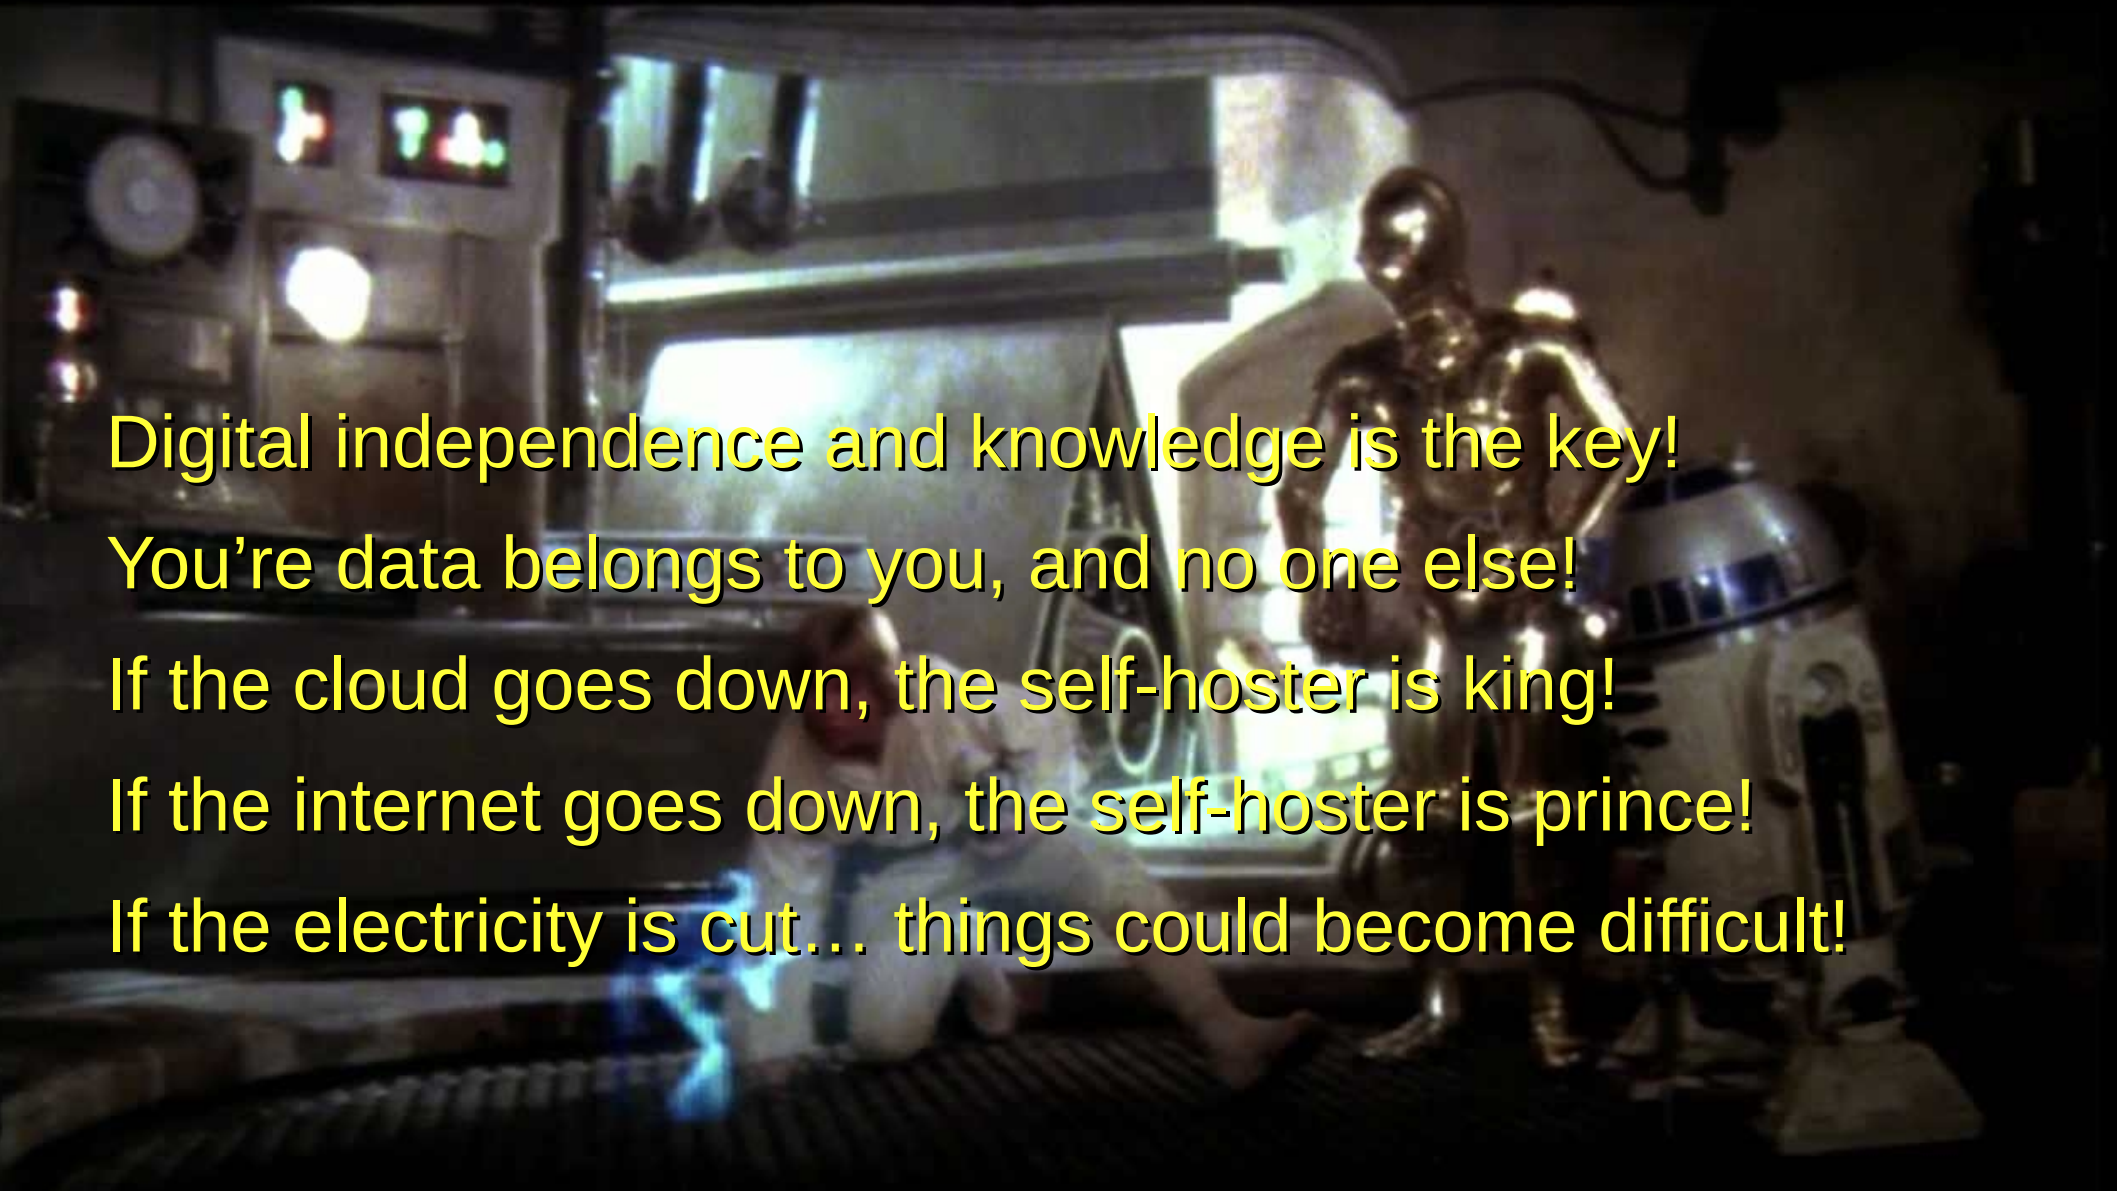

Proprietary cloud services are not the only way.

You can build it!

You can host it!

Or why not find a local company that helps you host or build it fully respecting your privacy?

There are plenty of OpenStack based, ethical cloud providers out there!
Meet some of them here today!

Digital independence and knowledge is the key!
You're data belongs to you, and no one else!
If the cloud goes down, the self-hosters are king!
If the internet goes down, the self-hosters are prince!
If the electricity is cut... things could become difficult!

Some options...

VMware

Microsoft Word

Office365

Teams/Slack

Twitter

Facebook

Azure/GCP/AWS

Proxmox

Vim!

Vim!, Libreoffice, Collabora, Collabora
Online, Nextcloud

Mattermost, Matrix, IRC, Rocket.chat
